

Release Notes for Webshipper Shipment Connector

2023

**Microsoft Dynamics
Business Central**

SaaS: 20 – 22

On-premises: 14-21

WSC 2.6.0.0 - Core 2.6.0.0

Customs: Sales Lines Discount

When Creating Customs lines, it will now use the total amount including Discount and VAT from the sales lines rather than simply the Unit price from item Card.

(ID: 39180)

WSC 2.4.5.0 - Core 2.4.5.0

Tasklet Pack & Ship Support

Support for Tasklet Pack & ship is now available

(ID: 39115)

WSC 2.4.0.0 - Core 2.4.0.0

New functionality: Customs Handling

It is now possible to handle your customs with shipments. More information on this functionality is available in our User Guides.

(ID: 38487)

WSC 2.3.0.0 - Core 2.3.0.0

Confirm Types not updating weight properly after Selecting “OK”

This bug has been fixed in the new version and is now working properly.

(ID: 38488)

Accounting for Tracking numbers received in header of API-call

We discovered that some tracking numbers were not updating in Business Central properly as we usually read them from the lines, however, some tracking numbers are sent via the header. This is now accounted for.

(ID: 38423)

When sending Multiple Collis, the Waybill Lines now attribute a unique tracking number to each line correctly.

The tracking numbers are now aligned to their related waybill line although it always functioned properly it has not visually optimal as the tracking number only showed the first tracking number received from the shipping agent.

(ID: 38423)

WSC 1.0.0 - Core 2.0.10

Webshipper Shipment Connector has been released on Microsoft AppSource
